

Use this guide to determine which thread size is right for you!

Size 69

Size 69 (Tex 70) is a middleweight thread used on home and commercial machines with a size 100/16 to 110 /18 needle. Its stitch appearance is inconspicuous, becoming more noticeable. It is the thickest size most home sewing machines can handle.

Size 92

Size 92 (Tex 90) is a middleweight thread used on commercial machines with a size 110/18 to 125/20 needle. Its stitch appearance is noticeable. Most people cannot break a size 92 nylon by hand.

Size 138

Size 138 (Tex 135) is a middle to heavyweight thread used on commercial and heavy-duty machines with a size 125/20 to 140/22 needle. Its stitch appearance is noticeable, beginning to stand out.

Size 277

Size 277 (Tex 270) is a heavyweight thread used on commercial and heavy-duty machines with a size 180/24 to 220/26 needle. Its stitch appearance stands out, becoming more of a focal point.
